Making Specialized Communication Easy

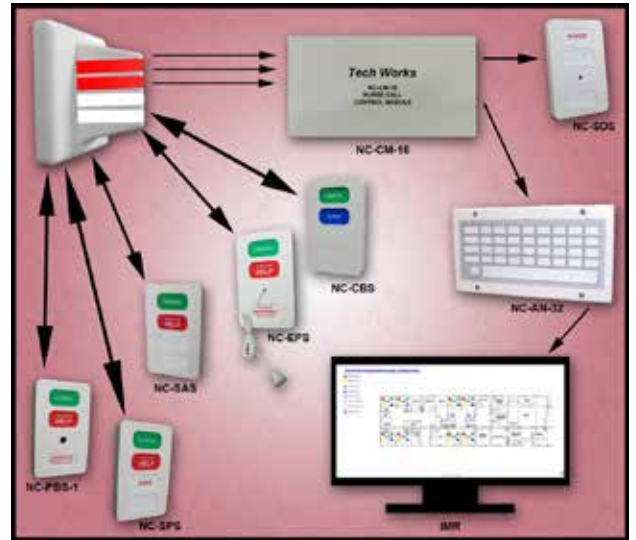

Product Profile

Tech Works NC-Series Receives UL Standard 1069 Compliance

Tech Works, a leader in specialized, highly focused communications Intertek ETL Listed C US EPS solutions for the most challenging environments, has received the coveted UL Compliance status for their new NC-Series Nurse Call Systems. Tech Works NC-Series Nurse Call System is now fully listed as compliant with Underwriters Laboratories Standard 1069, as well as Canada's CSA C22.2 No. 205 standard.

Founded in 1894, Underwriters Laboratories is a global independent safety science company with more than a century of expertise innovating safety solutions, from the public adoption of electricity to new breakthroughs in sustainability, renewable energy and nanotechnology. UL has a well-established reputation for employing exacting scientific processes and the highest ethical principles to deliver trusted results.

NC Series Flow 289x251 Based on more than 30 years of design and development, Tech Works NC-Series Nurse Call systems enable any new or existing facility to integrate all of the features and benefits of digital communications technology, without the need for expensive rewiring and configuration. Designed from the ground up to provide the ultimate in reliability and performance, Tech Works NC-Series systems are designed to easily install and operate over existing wiring, or via economical CAT5 cable. Easily and seamlessly integrating with existing systems, Tech Works NC-Series systems' low power circuitry is economical and virtually maintenance free.

"We're proud to have met the exacting requirements set forth by Underwriters Laboratories," remarked Tech Works Founder and President Mark Dundas. "Our engineering team has put a lot of time and research into developing NC-Series, and it is truly gratifying to have the recognition of a national testing laboratory."

Tech Works systems are a vital communications tool in leading hospitals and health care facilities across the United States. For more information on the new NC Series systems, please visit www.tech4people.com/portfolio/nurse-call.
